

Methylation profiling report

Supplier information

Sample identifier: **sampleName1540660609**
Sentrix ID: **202273260096_R03C01**
Material type: **KRYO DNA**
Gender: **NA**
Supplier diagnosis: **-**

Automatic prediction

Array type:	EPIC	
Material type:	KRYO DNA	✓
Gender:	female	!
Legend: ✓ OK ! Supplier information or prediction not available ✗ Warning, mismatch of prediction and supplier information		

Brain tumor methylation classifier results (v11b4)

Methylation classes (MCs with score >= 0.3)

methylation class glioblastoma, IDH wildtype, H3.3 G34 mutant

Calibrated score Interpretation

0.98 match ✓

Legend: ✓ Match (score >= 0.9) ✗ No match (score < 0.9): possibly still relevant for low tumor content and low DNA quality cases. ● Match to MC family member (score >= 0.5)

Class descriptions

Methylation class glioblastoma, IDH wildtype, H3.3 G34 mutant: The methylation class "glioblastoma, IDH wildtype, H3.3 G34 mutant" almost exclusively comprises tumors with glioblastoma, IDH wildtype histology as well as rare cases with anaplastic astrocytoma, IDH wildtype or embryonal histology. Location is typically in the supratentorial hemispheres; Median age is 19.5 years (range 0 to 40). The vast majority of cases in this class harbor mutations of codon 34 of the H3.3 gene (H3F3A). Copy number changes are numerous, with gain of 1q and 7 (>40% of cases) and (focal) loss of 4q, 10q and 13 (each in over 40%) being most frequent

Copy number variation profile

Depiction of chromosome 1 to 22 (and X/Y if automatic prediction was successful). Gains/amplifications represent positive, losses negative deviations from the baseline. 29 brain tumor relevant gene regions are highlighted for easier assessment.

(see Hovestadt & Zapatka, <http://www.bioconductor.org/packages/devel/bioc/html/conumee.html>)

MGMT promotor methylation (MGMT-STP27)

(see Bady et al, J Mol Diagn 2016; 18(3):350-61)

Disclaimer

Classification using methylation profiling is a research tool under development, it is not verified and has not been clinically validated. Implementation of the results in a clinical setting is in the sole responsibility of the treating physician. Intended for non-commercial use only.
