

Methylation profiling report

Supplier information

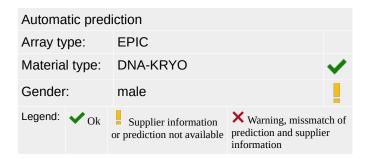

Sample identifier: GCGR-E53_XD5

Sentrix ID: 205715840165 R03C01

Material type: DNA-KRYO

Gender: NA

Supplier diagnosis: GBM

Brain tumor classifier results (11b4)

Methylation classes (MCs with score >= 0.3)

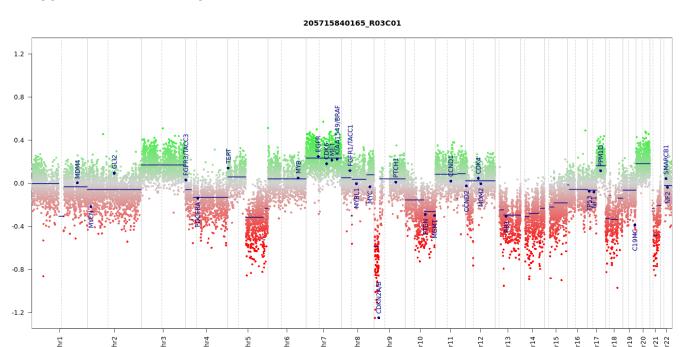

Methylation classes (MCs with score >= 0.3)	Score	Interpretation	
methylation class family Glioblastoma, IDH wildtype	0.67	no match	
MC family members with score >= 0.1			
methylation class glioblastoma, IDH wildtype, subclass RTK I	0.58	match	
Legend: Match (score >= 0.9) X No match (score < 0.9): possibly still relevant for low tumor contoquality cases.		ch to MC family member re >= 0.5)	

Class descriptions

Methylation class family Glioblastoma, IDH wildtype: The methylation class family "Glioblastoma, IDH wildtype" comprises the methylation classes glioblastoma, IDH wildtype, subtype RTK I to III, glioblastoma, IDH wildtype, subtype mesenchymal, glioblastoma, IDH wildtype, subtype MYCN and glioblastoma, IDH wildtype, subtype midline

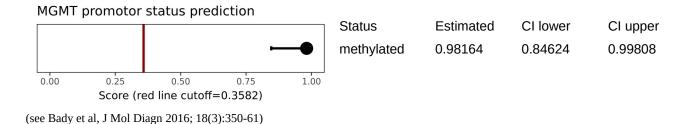

Methylation class glioblastoma, IDH wildtype, subclass RTK I: The methylation class "glioblastoma, IDH wildtype, subclass RTK I" is comprised of tumors with a histological diagnosis of glioblastoma, IDH wildtype. The tumors are located in the cerebral hemispheres. Median age is 64 years (range 29 to 84). Recurrent chromosomal alterations are gain of chromosome 7 with or without EGFR amplification (>80%), loss of 9p21 (CDKN2A/B; >50%) and chromosome 10 loss (>70%). Amplifications of the PDGFRA oncogene are enriched in this class (present in 20-30% of cases). Expression profiles often resemble the 'Proneural' subgroup according to the TCGA classification.

Copy number variation profile

Depiction of chromosome 1 to 22 (and X/Y if automatic prediction was successful). Gains/amplifications represent positive, losses negative deviations from the baseline. 29 brain tumor relevant gene regions are highlighted for easier assessment. (see Hovestadt & Zapatka, http://www.bioconductor.org/packages/devel/bioc/html/conumee.html)

MGMT promotor methylation (MGMT-STP27)
